# Proof that Vaccines Cause Autism

***225,000 preschoolers became extremely autistic after receiving DPT or MMR vaccines, over the last 75 years. Their lives have been destroyed by the pharmaceutical profit motive.***

Aluminum salts (aluminum hydroxide, aluminum phosphate, aluminum potassium sulfate) have been used as adjuvants in vaccines for over 70 years.[1]

Aluminum is a neurotoxin that crosses the blood-brain barrier, deposits itself in the brain, accumulates in sensitive areas (hippocampus, frontal cortex), and contributes to the pathogenesis of neurodegenerative diseases.[2-11]

Safety data for childhood vaccinations comes after the products are already on the market. Historical and current medical findings reveal a causal connection between childhood vaccinations and developmental disorders.[12]

Researchers measured aluminum in brain tissues of five donors with autism. Aluminum levels in each lobe (occipital, frontal, temporal, parietal) of all five individuals were the highest value for aluminum in the human brain ever found up to the date of their study.[13]

In another study, the aluminum content of brain samples from 20 donors without neurodegenerative diseases was consistently low.[14]

**Vaccines adulterated by aluminum are manufactured in defiance of U.S. Code 351 and Section 8(b) of the *Food and Drugs Act* by Johnson & Johnson, Merck & Co., Glaxo Smith Kline Biologicals, Sanofi Pasteur, and MCM Vaccine Company.**
